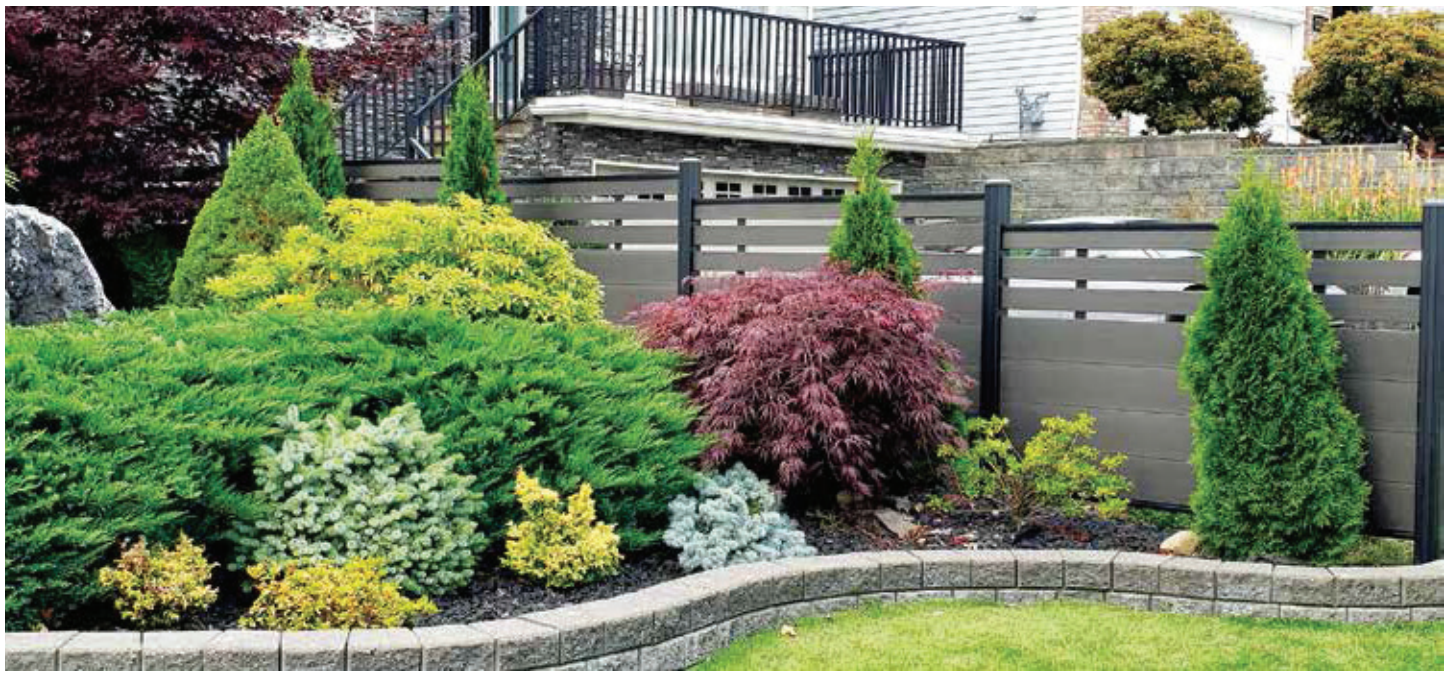
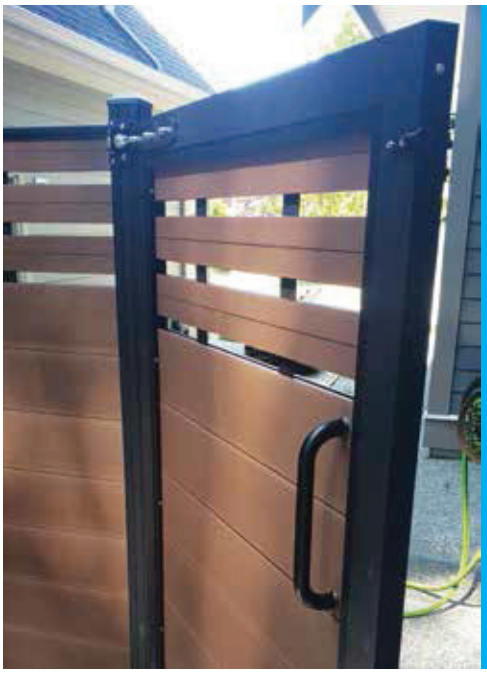
COMPOSITE FENCING

Defining Boundaries That Last A Lifetime

Inspired

A fence is a big part of your outdoor living space. Cleanline fence has the characteristics to compliment our natural environment. The texture, contrast, vibrance and how each component blends in seamlessly are the results of our attention to detail. Cleanline composite fence is the perfect balance, whether you are replacing an old rotting fence or creating a new updated look.





Security

Gates are an important feature that cannot be underestimated. Our gates can be made to match any fence design you have chosen. While keeping an elegant look, they are still very robust with a heavy-duty aluminum frame and hinge system. If security is a concern, our gate won't let you down.

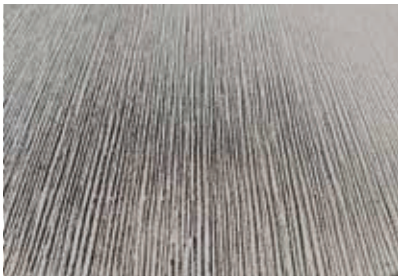
COLOR OPTIONS

BROWN

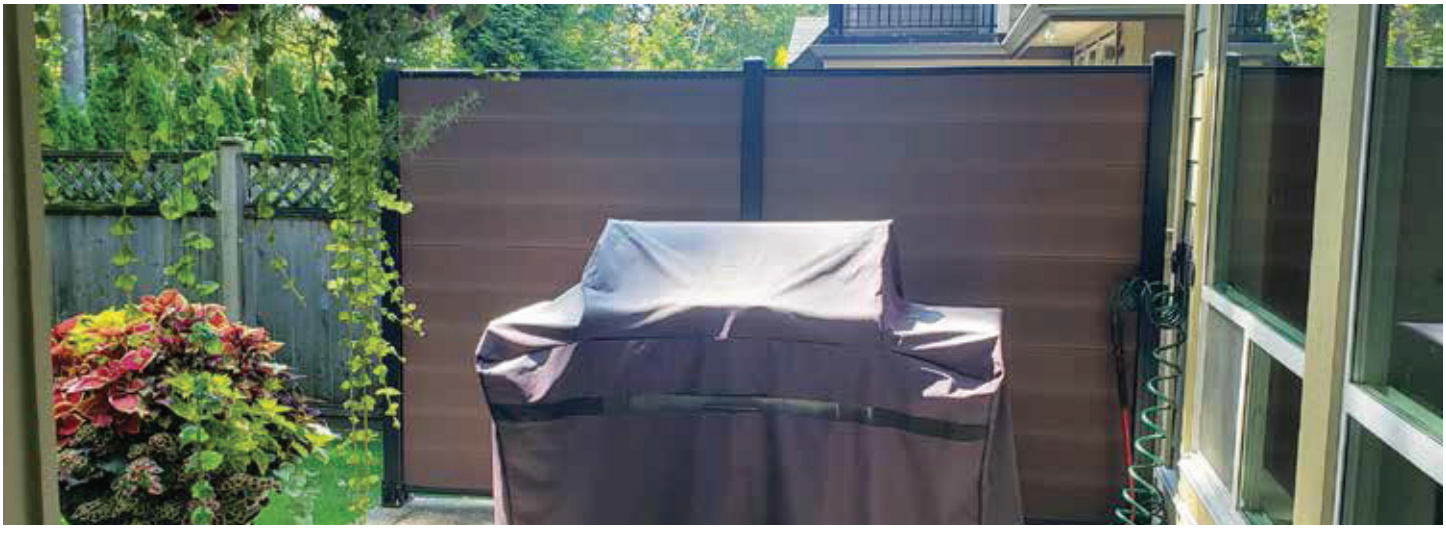


DARK GREY

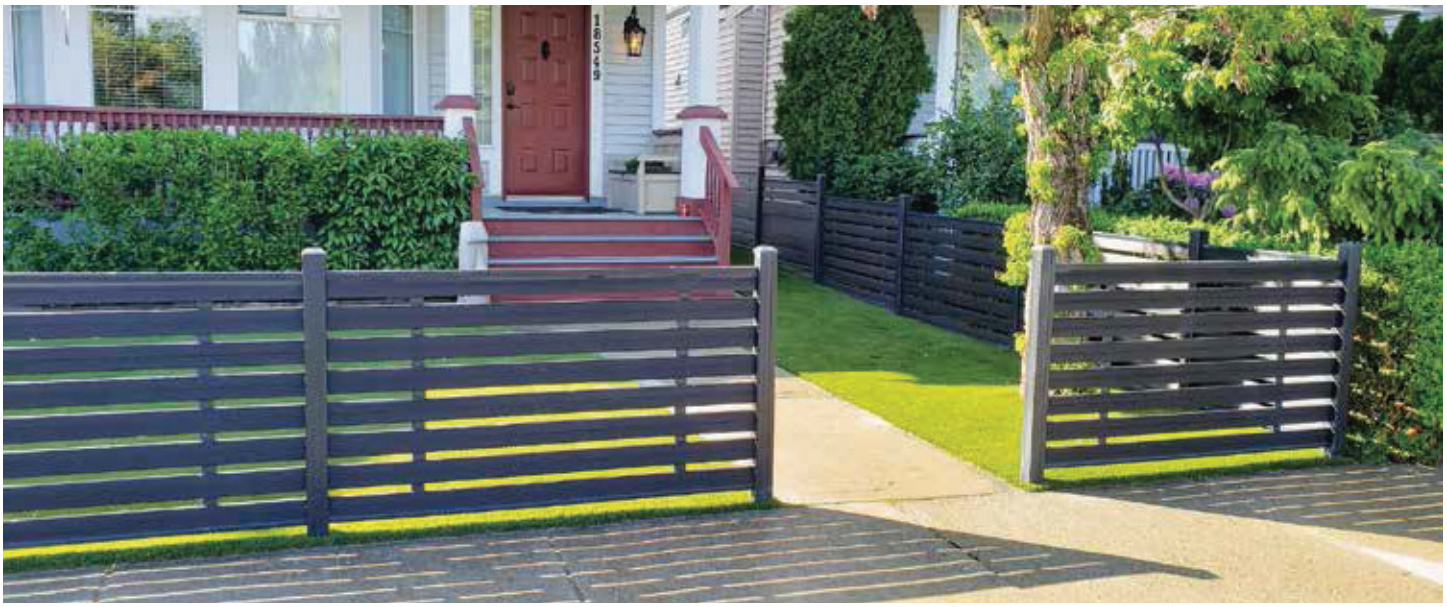
CEDAR

Inspired by nature, all of our fence boards have a natural brushed woodgrain finish. This not only gives it an amazing look but also provides texture to the fence. Our boards even feel like wood. The horizontal board design flows flawlessly throughout the fence line creating a beautifully unique look.

Color Disclaimer: Finished products may have minimal color variation due to being a manufactured product.



Cleanline products are made from eco-friendly materials that have exceeded all performance and durability tests, even withstanding winds of up to 95km/hr. Our unique design and 1-inch thick composite boards make Cleanline fencing stronger than either wood or vinyl. Our composite fencing will last up to 30+ years so you can enjoy your fence for decades to come.



Durable for Outdoor Projects

UV resistant, weather resistant and structurally stable in any climate.

State of the Art Designs

Cleanline offers some of today's most advanced fence designs for a modern look that won't go out of style.

Eco Friendly

Out products are made from recycled materials and contain no harmful elements or heavy metals.

Our fence posts and rails are made from black powder coated aluminum. All other components to our fence are made with aluminum and stainless steel. The panel boards are made from recycled plastic and wood fibre, giving it superior longevity and a natural appearance.
