

UNBREAKABLE Landscape Edging

Made from recycled high density polyethylene 

Precision Edge is a true end-to-end manufacturer utilizing 100% recycled materials to produce quality edging solutions for all of your landscape needs. Our products are made from post-consumer plastics that otherwise would end up in landfills.

Our edging is perfect for a wide variety of landscape applications. Precision Edge is the strongest, most environmentally friendly landscape edging available today. With its sleek black finish and easy installation, Precision Edge is the #1 choice for contractors in the landscape industry.

The Benefits

- Made in North America from 100% recycled high density polyethylene.
- Precision Edge is the strongest landscape edging available made from the most pliable plastic in the world.
- Stronger than aluminum edging.
- Aesthetically mimics black aluminum.
- Will not break or fracture under any circumstances due to its solid core construction.
- Ideal for straight lines, curves and corners.
- No coloring agents or chemical additives. 100% recycled material only.
- Great finishing edge for all landscape applications.
- Non-stick surface makes our products ideal for concrete forms.
- Will not rot or break down over time like wood products.
- Edging available in 1x4 and 1x6 black only.

GREAT FOR:
