

UNBREAKABLE Landscape Edging

Made from recycled high density polyethylene

Precision Edge is made from 100% recycled materials, creating quality edging solutions for all of your landscape and concrete forming needs. Our products are made from post-consumer plastics that otherwise would end up in landfills.

Our edging is perfect for a wide variety of landscape and concrete forming applications. Precision Edge is the strongest, most environmentally friendly landscape edging available today. With its sleek finish and easy installation, Precision Edge is the #1 choice for commercial grade edging..
